Forecast for Wednesday 21 Jun 2023

Weather: During the early hours any patchy low cloud and fog that has formed, primarily in the west, will lift and break. A generally dry start with some sunny spells. Scattered showers developing from mid-morning and into the afternoon, these have the potential to be locally heavy and thundery. Showers dying out into the evening to leave some late evening sunshine.

Chance of cloud-free hill tops above 600m: 40% in the west, 70% in the east, at first, rising to 80-90% for all by the later morning/early afternoon.

Low cloud and visibility: Patchy low cloud around 300-500m during the morning largely in the west will lift and break. Any fair-weather and shower cloud that develops will be above most summits however bases may be around 600-800m for a time during late morning to early afternoon. Moderate to poor visibility in low cloud during the early hours improving to good. Visibility dropping to moderate or poor during any showers.

Meteorologist's View

Slopes and paths may be slippery following yesterday's heavy rain, and waterproofs will be required in case of any heavy showers. Although it will be fairly cloudy UV levels will still be moderate to high so appropriate precautions to protect your skin should still be taken.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 22 Jun 2023

Weather: Some patchy low cloud mist and fog, especially in the valleys at first, this lifting and breaking through the morning. A warm and sunny day to follow with the odd shower that could be locally heavy.

Maximum wind: Southwesterly 15 mph with isolated gusts 20-25 mph at the summits in and around showers.

Chance of cloud-free hill tops above 600m: 60% in the west first thing, rising to 90% by late morning. 90% in the east throughout.

Low cloud and visibility: Patchy low cloud around 500-600m and shallow fog in the valleys at first giving moderate to poor visibility. Otherwise, good visibility dropping to moderate or poor in any showers.

Temperature: **Valleys:** Plus 12 Celsius, rising to plus 23 Celsius.
At 600m: Plus 12 Celsius, rising to plus 16 Celsius.
Freezing level: Above the summits.
